Subject: Your vaccine report to NVIC

Dear Ms. Hollowell,

Thank you for your reaction report. When you submitted your report to NVIC a webpage (<http://www.nvic.org/Forms/ThankYou.aspx>

National Vaccine Information Center – Vaccine \

www.nvic.org

National Vaccine Information Center is a non-profit organization dedicated to preventing vaccine injuries and deaths.

) should have been displayed containing many links that have been helpful to many people who file reaction reports with us. We hope that this webpage provided you with useful information and next steps. If the webpage didn't answer all of your questions and concerns, please let me know.

I am sorry that you reacted badly following your flu vaccine in 2013. NVIC does not contact individual vaccine administrators in regards to a vaccine

reaction or administration error. As the administration of the vaccine could have played a role in your reaction, I would recommend filing a report to the Institute for Safe Medication Practices. While I am not sure they follow up on individual reports, they may be able to offer you more assistance in regards to your concerns on vaccine administration.

Here's our webpage for Vaccines and Diseases. You may also find our Know the Risk page, our vaccine FAQ's page, our Ask 8 guide and our vaccine ingredient calculator helpful. Please thoroughly research **any** vaccine being considered for yourself or a family member **before** making a decision. Your health. Your family. Your choice.

I hope you find this information helpful and valuable. NVIC is a charitable non-profit organization and provides this information for educational purposes.

Again, thank you for completing our NVIC reaction registry.

Sincerely,

Judith Jolly, RN, BSN
Director of Vaccine Response Reporting

City: Peachtree City

State/Province: GA

Zip/Postal Code: 30269

Country: USA

Phone: 770-883-3839

Name of person who reacted: Mary Hollowell

Date of Birth: 6/26/1964 12:00:00 AM

Date of Death:

Current Age: 51

Date Vaccines Received: 10/1/2013 12:00:00 AM

Which Vaccine: Influenza – Inactivated, injected (Fluarix, Fluviron, Fluzone) ? MH

WhichVaccineOthers:

Primary Reaction: dizziness, confusion, disinhibition, gastrointestinal heat

Date Reaction Started: 10/1/2013 12:00:00 AM

Current Health Problems: fatigue

What Happened: Please tell your story.: serious adverse reaction to "influenza" vaccine administered at 9:30 AM on Oct. 1, 2013, by Nurse Joni in Dr. Michael Obenshain's office. He is in internal medicine with Piedmont Physicians, 4000 Shakerag Hill Ste. 301, Peachtree City, GA, 30269. 770-486-7100 It led to 48 hours of symptoms including confusion, dizziness, disinhibition when questioned, heat in intestinal are 24 hours following I have serious concerns about how this vaccine was administered by Joni. It was rapid speed administration. As soon as I signed the consent form, she rushed out & immediately returned with a partially-unwrapped (encased in a plastic sleeve) filled syringe and jabbed me. This was faster than any injection I've ever received and other flu shots I've had have been drawn out of a vial. I had recently returned from a Fulbright Scholarship in China ~ 2 months prior. I had vaccination prior to that trip at Emory Travel Clinic. Never, however, have I had this type of a reaction to a vaccine. Please investigate the severe consequences of this "flu" vaccine administered by Joni at Piedmont Physicians, Peachtree City, GA. There was an unfamiliar woman doctor present that day but I'm unsure if she was involved in my treatment. I also had blood drawn.
Thank you, Mary Hollowell
